Senior Mobile Application Developer | Native Android & Flutter

Senior Mobile Application Developer proficient in **Native Android (Kotlin/Java - 6+ years)** and **Flutter (2+ years)**, **core experience in iOS (Swift)** specializing in building user-friendly, scalable, and responsive applications. Highly skilled in architectural patterns (MVVM, Clean Architecture), code maintainability, and managing the full mobile development lifecycle from planning to publishing on both Google Play and the App Store. Known for solving complex technical challenges and driving measurable improvements in app performance and stability.

WORK EXPERIENCE

Myvalam • Oct 2020 - Present

Senior Mobile Application Developer • Freelancer

- Enhancing and maintaining existing mobile applications, overseeing the full development lifecycle from design to store release.
- Actively exploring **permanent opportunities** but open for freelance, both **remote and onsite**, to contribute to innovative mobile application projects.
- Committed to continuous learning and upskilling to stay aligned with modern mobile technologies and on a path to full-stack mobile application developer.

Senior Mobile Application Developer until Oct 2025 • Full-time

- Worked on functional implementation, deployment, and technical troubleshooting while collaborating with cross-functional teams (QA, Design, Backend) to deliver robust and scalable mobile applications by establishing **high code maintainability** and **clarity** to ensure **rapid onboarding** and seamless knowledge transfer for all developers.
- Developed and maintained both native (Android – Java/Kotlin) and hybrid (Flutter) applications, translating UI/UX designs and wireframes into high-quality, responsive code with clean architecture and modular design principles.
- Managed the complete mobile app development life cycle — from planning and design to testing, deployment, and publishing on the Play Store and App Store.
- Built and enhanced applications across various domains, including food and grocery delivery, logistics, industrial e-commerce, club membership, HRMS, and employee financial aid solutions, implementing performance optimization and crash-free stability improvements.
- Integrated REST APIs, JSON, Location Services, Camera Integration, and third-party libraries for social logins, Google Maps, real-time data updates, and push notifications using Firebase Cloud Messaging (FCM), Firebase Database, and analytics tools such as Firebase Crashlytics.
- Implemented secure payment gateways (Razorpay, Worldline, Hitpay, and more) and authentication systems using OAuth, JWT, and Firebase Authentication, enhancing user trust and overall app reliability.
- Applied modern architectures (MVVM, Clean Architecture) and utilized frameworks and libraries such as Jetpack Compose, Coroutines, Flow, Hilt, Retrofit, GSON, Room, SQLite, Dio, Drift (Moor), Provider, GetX, Riverpod, and Bloc to deliver scalable, maintainable, and high-performing mobile applications.
- Integrated native Android and iOS functionalities into Flutter applications using Platform Channels to enable seamless communication between Flutter and native modules.
- Kept up to date with emerging technologies and mobile development trends to deliver innovative and high-quality solutions while following Test-Driven Development (TDD) and clean code principles.
- Utilized Git and GitHub for version control, code reviews, branching, and collaborative development with continuous integration and deployment practices.

Magespider Infoweb Pvt. Ltd • Ahmedabad • Jan 2019 - Aug 2019

Jr Android Developer • Full-time

I worked as an Android Developer responsible for complete app development - from UI/UX design and coding to making apps ready for production deployment. I collaborated with teammates to build and enhance multiple Android applications using Java, Kotlin, XML, Retrofit, REST APIs, Google Maps and more. This role strengthened my skills in clean architecture, version control, and project coordination, while improving my problem-solving and debugging capabilities.

Giggles Infotech • Ahmedabad • Feb 2017 - Jul 2017

Jr Android Developer • Full-time

Responsible for maintaining existing in-house products and developing client service projects, including UI design, feature implementation, and backend REST API integration for Android applications.

SKILLS

Languages, Tools & Frameworks: Java, Kotlin, Android Studio, Dart, Flutter, Swift, Xcode, Postman

Android: Retrofit and GSON, SQLite, Room Database, MVVM Architecture, Jetpack Compose, Coroutines, Flow, Hilt

Flutter: Dio, State Management (Provider, GetX, Riverpod, Bloc), Clean Architecture, Platform Channels (Native Integration), Drift (Moor), get_it and injectable (Dependency Injection)

Common: REST APIs, JSON, Google Maps, Location Services, Camera Integration, Social Media Integration, Firebase, Supabase, Push Notifications (FCM), Foreground Services, MQTT, GraphQL, Git, Gemini / Generative AI, Offline Data Storage and Sync, Asynchronous Programming, Performance Optimization, Error Handling, Debugging, Responsive UI/UX Design

Project Management: Code Reviews, Version Control (Git), Documentation, Debugging and Troubleshooting, Cross - Functional Collaboration, Sprint Planning, Performance Monitoring, Test-Driven Development (TDD), Unit and Integration Testing, Exploring (Agile/Scrum and CI/CD)

Languages : Gujarati | Native, Hindi | Advanced, English | Advanced

PROJECTS (SELECTED)

Cosmopolitan Club Chennai

Myvalam

- Developed an app enabling club members to view and pay bills, book games (Pickleball, Badminton) and facilities (Rooms, Banquets).
- Showcases all club facilities with easy access. Integrated notifications for upcoming events and updates to enhance member engagement.
- [Play Store](#) and [App Store](#)

Hypex Mart

Myvalam

- Built an industrial e-commerce app where customers can browse and purchase equipment with ease.
- Features include adding items to cart, managing or creating delivery addresses, secure online payments, and real-time order tracking.
- Designed to deliver a seamless, safe, and reliable shopping experience tailored for industrial needs.
- [Play Store](#)

Kanzpayday

Myvalam

- A financial assistance app designed to simplify employee aid applications with an intuitive and seamless experience.
- Key features include document capture, automated eligibility verification, and secure data handling, ensuring employees can conveniently access the support they need in one place.
- [Play Store](#) and [App Store](#)
